

Coronavirus disease 2019, also known as COVID-19, is spreading in the United States. The disease causes respiratory illness such as cough, fever, and in more severe cases, trouble breathing. The best way to prevent illness is to avoid being exposed to this virus:

- **Wash your hands** with soap and water for at least 20 seconds.
- **Avoid touching your eyes, nose, and mouth** with unwashed hands.
- **Stay home** if you can. If you must go out, **maintain a distance of at least 6 feet from others**.

More information and advice on COVID-19 prevention can be found below:

CDC: <https://www.cdc.gov/coronavirus/2019-ncov/>

What to do if you feel sick

If you are sick with COVID-19 or think you might have it, follow the steps below to help protect others:

- Call ahead before visiting the doctor and stay home except to get medical care. Most people who are mildly ill with COVID-19 are able to recover at home.
- Clean your hands often and cover your coughs and sneezes.
- Avoid sharing household items and separate yourself from others in your home.

If you develop any of the following **emergency warning signs, get medical attention immediately**.

- Difficulty breathing or shortness of breath.
- Persistent pain or pressure in the chest.
- New confusion or inability to arouse.
- Bluish lips or face.
